

General Material Notice for The Villages Golf and Country Club:

Killroy Pest Control provides structural pest control to The Villages Golf and Country Club. Our treatments are limited to the structure requesting service except during our annual, community wide ant treatment. Per label requirements and California regulations, our spray treatments will be under protected eaves and within 3 feet of the foundation perimeter of the structure being treated. Rodent bait will be applied in compliant, tamper resistant bait stations. Materials to be used at The Villages are listed in the table below.

<b>Material</b>	<b>EPA Reg. No.</b>	<b>Active Ingredient</b>	<b>Signal Word</b>
Tempo Ultra WSP	432-1377	Beta-Cyfluthrin	Caution
Alpine WSG	499-561	Dinotefuran	Caution
Termidor SC	7969-210	Fipronil	Caution
Evergreen	1021-2560	Pyrethrins	Caution
Fastrac All Weather Blox*	12455-95	Bromethalin	Caution
Ditrac All Weather Blox*	12455-80	Diphacinone	Caution

\*Rodent bait.

You will receive a material notice after completion of each treatment that will indicate material used, areas of application and the quantity applied. Killroy strongly recommends avoiding contact with treated areas until they are dry. If an interior spray treatment is completed, we ask that you vacate the treated areas for 4 hours or until material is completely dry. Please also keep pets and children away from any rodent baits or traps.

All of the materials used by Killroy Pest Control have been registered with the Environmental Protection Agency and have been approved for use with the understanding that they will be used around homes with families and pets.
